Requirements for Pre-packaged Temporary Food Facilities at Community Events

1. Pre-packaged Temporary Food Facility (TFF) Permits are limited to the selling of prepackaged foods. No cooking or food preparation (except the food samples) is permitted. Only foods listed in the permit application and approved by Marin County Environmental Health Services may be sold. Cooking (including barbecuing) requires a Limited or Full-Service TFF permit.

2. Prepackaged foods shall be labeled. Labeling shall include the common name of the product, an ingredients list by order of weight, a statement of quantity (e.g. net weight, volume or count) and the name, address and zip code of the producer. Sample labels must be submitted with your application.

3. Non-potentially hazardous foods sold in bulk must be dispensed from fully enclosed containers with hinged lids. Labels for each product shall be posted on each container. No cutting or portioning is permitted.

4. Vendors who are selling products purchased from a wholesale manufacturer need to submit a copy of the food processing permit (State Health Permit) from the facility where the food is processed and packaged at, even if the facility is located in another county, or owned by another party. OR

   If the product being sold is purchased from a facility that manufactures for retail, you need to submit a copy of the facility’s local County Health permit.

5. Submit a completed Shared Food Facility/Commissary Agreement. A valid commissary agreement may be required to operate at Community Events. There can be no lapse in time between commissaries. It is the responsibility of the permittee to submit a new commissary agreement to Marin County Environmental Health, when a change in commissary occurs.

6. If you are selling potentially hazardous foods, maintain a probe thermometer at your table to monitor internal food temperatures, and take any necessary actions as needed, such as providing more ice on and around your food products. All potentially hazardous foods shall be maintained at or below 41 degrees Fahrenheit.

7. Refer to the enclosed guidelines for approved sampling methods. Sampling methods must first be approved by Marin County Environmental Health Services, and must be done in accordance with the provisions of California Retail Food Code (Cal Code).

8. Post a sign with THE name and address of the business at the table or booth. One option is a magnetic sign. The permit must also be conspicuously posted.
GUIDELINES FOR SAMPLING PRE-PACKAGED FOODS

Providing samples allows customers to try a product before purchasing it. However, unsafe sampling methods can adulterate or contaminate food and can result in food borne illness. The California Retail Food Code (CAL CODE) requires that basic sanitation practices be followed when samples are dispensed at community events. Marin County’s Environmental Health Services (EHS) interprets the state law, as follows, to ensure that the public’s health is protected. Follow these basic sanitation practices for healthy and legal sampling.

1. Sampling of potentially hazardous foods requires a written procedure approved by EHS.

2. Produce intended for sampling must be washed. Washing is to remove dirt, soil, and any other contaminants. An antiseptic vegetable wash product is strongly recommended.

3. Set up the hand washing and utensil washing stations FIRST. Thoroughly wash hands before the Farmers’ Market. Food handling at the Farmers’ Market requires a hand washing station.

   If money is handled, hands must be rewashed.

4. A hand washing station consists of the following:
   - a 5 to 7 gallon container of water with a hands free dispensing valve
   - a 5 gallon catch basin
   - potable water at 100 degrees Fahrenheit
   - liquid hand washing soap in pump or squeeze bottle
   - paper towel supply for the entire day.

   A utensil washing station consists of 3 five-gallon containers: one with soapy water for washing, one with clean water for rinsing, and one with bleach in water for sanitizing (use one tablespoon bleach per gallon of water to provide a solution of 100 ppm chlorine); OR another method of providing sanitized utensils approved by EHS.

5. Provide containers with sneeze and handling protection.

6. Use disposable gloves when cutting or handling products. Do not reuse gloves after touching contaminated surfaces, or money.

7. Use tooth picks, wax paper, paper sampling cups, or disposable utensils to distribute samples. The idea is to prevent customers’ hands or fingers from touching the samples or contaminating the food.

8. Use only sanitized knives and cutting boards for cutting samples.

9. Use a plastic bag lined waste basket for sample preparation and distribution waste disposal.

10. Wastewater from handwashing and utensil washing stations may be dumped in the portable toilets on-site or in the mop sink back at the commissary. Do not dump wastewater on ground or pavement; or down the storm drain. All wastewater must go to the sanitary sewer.

Required items for proper sampling

Bottom left to right:
disposable single use utensils, covered sampling container, tongs, knife and cutting board

Top left to right:
Waste basket with liner, disposable latex or plastic gloves

Examples of Marin County EHS approved sampling methods.

Provide containers with hinged covers to prevent food contamination.

Use of tongs to give out sample.

This method provides the best way to keep the food samples from being contaminated. Vendor is in complete control of the sampling process. This method is highly recommended.
Here is another example of how to protect your samples. Notice the samples have tooth picks already so customer does not have to touch the sample. Cake cover acts as a sneeze protector.

If you are sampling nuts of any kind, you must use a nut-shaker similar to the ones pictured.

APPENDIX A: HANDWASHING AND UTENSIL WASHING REQUIREMENTS

Handwashing Facilities – Provide a five (5) gallon thermal water container, with a dispensing valve to leave hands free for washing; a waste-water container; soap dispenser, and paper towels for handwashing within the food booth. Handwashing facilities shall be separate from the utensil washing sink. Warm water (100° F) is required.

Utensil Washing Facilities – Booths with food preparation require three 5-gallon containers for the cleaning of equipment, utensils, and general cleaning purposes. One shall contain soapy water, one with clear rinse water, and the third a bleach/water solution (use 1 tablespoon of household bleach per gallon of water.)

NOTE: Additional facilities, such as a 3-compartment sink with running water, may be required where there is extensive food preparation, or where water, power, and sewer connections are available.

All wastewater must go to the sanitary sewer. Do not dump on ground or down a storm drain.
This page has been left intentionally blank to print back to back.
Pre-packaged Temporary Food Facility Permit Application

To apply for a permit to operate, fill out this application completely and submit the following items:

- ✔ Sample Food Labels for the products being sold
- ✔ Shared Food Facility/Commissary Agreement (must be complete and signed by applicant and commissary owner)
- ✔ Health Permit License Application
- ✔ Copy of the State Food Processing Permit from the facility where the food is processed and packaged, if the product you are selling is purchased from a wholesale manufacturer; OR if the food processor manufactures for retail, submit a copy of the facility’s local County Health Permit.
- ✔ Health Permit Fee (see current fee schedule)

Proposals received less than two weeks prior to an event may not be approved if there is insufficient time to verify the information. Additional fees may be charged for late submittals. Incomplete or illegible proposals will not be processed.

I understand and agree to provide for the following requirements: (Check all that apply)

- [ ] sanitary wastewater disposal
- [ ] potable water
- [ ] proper disposal of refuse & garbage
- [ ] hot & cold water for vehicle cleaning
- [ ] food preparation area
- [ ] vehicle/cart storage (circle one) vehicle make/year ____________ license plate # ________
- [ ] adequate storage for food/equipment
- [ ] utensil washing
- [ ] electrical hookups
- [ ] toilet & hand washing facilities
- [ ] overnight vehicle storage

I hereby declare that I hold a valid Environmental Health Permit to Operate a commissary as defined by the California Health and Safety Code §114326. (INCLUDE A COPY OF VALID ENVIRONMENTAL HEALTH OR STATE PERMIT.) I hereby declare and certify that the business named in Section I is operating out of the above commissary. I will notify Marin County Environmental Health, by written document, of any change in the status of my operation, my environmental health permit, or when this commissary agreement is terminated.
