Coastal staff draft changes to Marin's LCPA now available for comment

As shown below, Coastal Commission staff has released draft Suggested Modifications to the Marin County Local Coastal Program Amendments. Consistent with the mandates and spirit of the Coastal Act's call for the "widest opportunity for public participation" (Section 30006) "by all interested groups and the public at large" (Section 30339), Marin County is posting these materials on the MarinLCP.org website to assure that all parties have "maximum opportunities to participate (Section 30503)."

Hi Tom,

For your reference, here are the versions of the draft suggested modifications that we have shared with stakeholder groups that have specifically requested them (i.e. EAC and CCPN). We are happy to share with other groups as they request them...

Best regards,

Shannon

Subject: CCC's Staff Modifications to Marin County LCPA

Hi all,

Attached please find Commission staff draft modifications to the County-submitted Land Use Plan (without the hazards chapter) and draft modifications to the Implementation Plan (without the hazards section). These draft modifications must be understood as preliminary and we reserve the right to change them, whether due to conversations with the County, stakeholders or otherwise.

We look forward to our continued discussion.

Best regards,

Shannon Fiala
