

**Public Review Draft: Marin Stream Conservation Area Ordinance  
February 25, 2013**

**CHAPTER 22.33 – STREAM PROTECTION**

**Sections:**

22.33.010 – Purpose of Chapter

22.33.020 – Applicability

22.33.030 – Stream Conservation Area General Requirements

**22.33.010 – Purpose of Chapter**

The provisions of this Chapter are intended to implement the Stream Conservation Area (SCA) policies and programs in the Countywide Plan to protect the active channel, water quality and flood control functions, and associated fish and wildlife habitat values along streams. This is accomplished by assuring that permitted development avoids SCAs wherever feasible, minimizes any unavoidable incursion into the SCA, and mitigates adverse impacts.

**22.33.020 – Applicability**

A. The SCA consists of the stream itself between the tops of the banks and a strip of land extending laterally outward from the top of both banks to the widths defined in Section 22.33.030.B and shown in Figure 3-16. The SCA extends along those perennial, intermittent, and ephemeral streams identified in the SCA data and map that is maintained and periodically updated by the Marin County Community Development Agency.

The SCA encompasses any jurisdictional wetland within the stream channel, together with adjacent uplands, and supersedes setback standards defined for Wetland Conservation Areas in the Countywide Plan.

- B. The standards of this Chapter apply to all areas of the County located within the SCA excluding the following:
1. The Coastal Zone as defined by the Coastal Act of 1976;
  2. Tidally influenced waters and adjacent land;
  3. Land adjacent to levees, dikes, berms, and publicly owned or maintained flood control or water conservation district facilities;
  4. Official activities and development of the County, State or an agency of the State, or the Federal Government on land owned or leased by a governmental agency.

**22.33.030 – Stream Conservation Area General Requirements.**

**A. Requirements.**

Consistent with the purpose of this Chapter, the following requirements shall be implemented to achieve maximum protection of stream and riparian resources:

1. Development shall avoid SCAs wherever feasible.
2. Where complete avoidance of an SCA is not feasible, the stream channel shall be avoided to the maximum extent feasible and incursion into the SCA shall be minimized.
3. Development within the SCA shall not be permitted if it would directly or indirectly result in any of the following:
  - a. Adverse alteration of hydraulic capacity; or
  - b. A net loss in habitat acreage, value, or function; or
  - c. Degradation of water quality.

**B. SCA Setbacks.**

The Stream Conservation Area includes setbacks as provided in this subsection.

1. SCA setbacks for properties within the City-Centered Corridor:
  - a. For lots more than 2 acres in size, the SCA setback shall be a minimum of 100 feet from each side of the top of bank;
  - b. For lots from 0.5 acres to 2 acres in size, the SCA setback shall be a minimum of 50 feet from each side of the top of bank; and
  - c. For lots less than 0.5 acres in size, the SCA setback shall be a minimum of 20 feet from each side of the top of bank.
2. SCA setbacks for properties within the Inland Rural Corridor, Baylands Corridor, and Coastal Corridor shall be the greater of either: (a) 50 feet landward from the outer edge of woody riparian vegetation associated with the stream; or (b) 100 feet landward from the top of bank.
3. In all Corridors, regardless of lot size, an additional SCA setback may be required based on the results of a Site Assessment. A Site Assessment may also be required to confirm the avoidance of woody riparian vegetation and to consider site constraints, identify the presence of other sensitive biological resources, provide options for alternative mitigation, and determine the precise SCA setback.
4. For all mapped ephemeral streams, the SCA setback applies only if there is riparian vegetation that extends along the stream for a continuous length of 100 feet or more.

**Figure 3-16**  
**Typical Cross-Section of a Stream Conservation Area**

- \* Minimum SCA setback distance of 100 feet from top of bank for lots more than 2 acres.
- \* Minimum SCA setback distance of 50 feet from top of bank for lots from 2 to 0.5 acres.
- \* Minimum SCA setback distance of 20 feet from top of bank for lots less than 0.5 acres.

## **Chapter 22.63 – STREAM CONSERVATION AREA PERMIT**

---

### **Sections:**

- 22.63.010 – Purpose of Chapter
- 22.63.020 – Applicability to Development
- 22.63.030 – SCA Permit (Tier 1)
- 22.63.040 – SCA Permit (Tier 2)
- 22.63.050 – Application Filing, Processing and Review
- 22.63.060 – Decision and Findings

### **22.63.010 – Purpose of Chapter**

This Chapter provides procedures for the processing of Stream Conservation Area (SCA) Permits where avoidance of the SCA is not feasible.

### **22.63.020 – Applicability to Development**

#### **A. Application of SCA Provisions.**

1. The provisions of this Chapter apply to permitted development within the Stream Conservation Area as described in Chapter 22.33 (Stream Protection). Except as specified in this Chapter, the exemptions from Land Use Permit Requirements in Section 22.06.050 (Exemptions from Land Use Permit Requirements) do not apply to development within the Stream Conservation Area. Compliance with this Chapter does not affect applicability of any other requirements by this or any other agency. As used in this Chapter, permitted development includes the following structures and other development activities:
  - a. All structures, regardless of whether the work requires a building or grading permit, including fencing, decks, platforms, parking lots, utility crossings, pedestrian or vehicular access routes, and other similar improvements;
  - b. Clearing of land including the removal of any vegetation or any protected or heritage tree;
  - c. The deposition of refuse or other nonindigenous material not otherwise subject to a permit pursuant to Marin County Code Section 11.08 (Watercourse Diversion or Obstruction); or
  - d. Any other activities determined by the Director to have potentially adverse impacts to hydraulic capacity; habitat acreage, value or function; or water quality.

#### **B. Exemptions.**

##### **1. Exempt without further determination.**

- a. Public utility facilities and their maintenance proposed pursuant to Government Code Section 53091 , Public Resources Code Section 4292, and the California Public Utilities Code;

Stream Conservation Area  
Public Review Draft v1.0

- b. Emergency measures requiring prompt action, where such measures are immediately necessary to avoid or prevent loss of, or damage to, life, health, property or essential public services resulting from a sudden, unexpected occurrence;
  - c. Tree and vegetation removal or trimming for the purpose of protecting life or property from a fire hazard, public nuisance, or any other threat to public health and safety (vegetation removed under this exemption may also be dead, invasive, or exotic);
  - d. Resource management programs carried out in accordance with the programmatic requirements or funding of a governmental agency or in coordination with a governmental agency;
  - e. Necessary infrastructure and vegetation maintenance activities of a governmental agency, whether on public or private land;
  - f. Any development that is solely permitted pursuant to Marin County Code Section 11.08 (Watercourse Division or Obstruction) or Section 23.08 (Excavating, Grading and Filling);
  - g. Maintenance of permitted or legal non-conforming structures, water supply and septic facilities that existed prior to February 25, 2013.
  - h. Maintenance or replacement of landscaping.
  - i. Fencing that does not restrict wildlife access to a riparian habitat;
  - j. Agricultural uses on property zoned for agriculture (A, ARP or APZ) that do not result in the removal of woody riparian vegetation or animal confinement within the SCA.
- 2. Exempt subject to determination.** The following activities are exempt subject to determination by the Director, based upon appropriate documentation submitted by the applicant, to confirm that the activity will meet the criteria below.
- a. Repair and replacement of permitted and legal non-conforming structures, water supply and septic facilities that existed prior to February 25, 2013, provided that such activity does not expand the extent of the horizontal incursion or the footprint or result in the removal of woody riparian vegetation.
  - b. Structures and development activities pursuant to Section 22.63.020.A.1 located within previously disturbed areas as determined by the Director.

**22.63.030 – Stream Conservation Area Permit (Tier 1)**

- A. SCA (Tier 1) Development.** Permitted development activities eligible for consideration under the Stream Conservation Area (Tier 1) Permit Review Procedures include but are not limited to:
- 1. Additions to permitted or legal non-conforming structures that existed prior to February 25, 2013, provided that such additions do not increase the existing horizontal incursion into the SCA and do not result in the expansion of the existing building footprint within the SCA by more than 500 square feet;

Stream Conservation Area  
Public Review Draft v1.0

2. New or expanded water supply or septic facilities, including any excavation or disturbance that is necessary for facility connections;
3. New decks, platforms and other similar improvement as determined by the Director;
4. Pedestrian or vehicular access routes, including paths, ramps, driveways, roads and bridges;
5. Drainage improvements, such as downdrains, pipes and swales;
6. Erosion control structures, such as retaining walls, riprap, and checkdams;
7. Necessary water supply and flood control projects.

Development activities listed herein shall be ineligible for an SCA Permit (Tier 1) Procedure if the proposed development would not incorporate applicable Standard Management Practices as required by a Site Assessment or would result in adverse impacts to hydraulic capacity; habitat acreage, value or function; or water quality.

**B. SCA (Tier 1) Project Review Procedure**

1. **Ministerial Review.** The Stream Conservation Area Permit (Tier 1) shall be undertaken as a ministerial action subject to implementation of required Development Standards and project-specific Standard Management Practices.
2. **Development Standards.** Stream Conservation Area (Tier 1) Permits shall comply with the following development standards:
  - a. Where permitted development within an SCA would result in removal of riparian vegetation, such vegetation must be replaced on-site as required in accordance with a Standard Management Practice or Site Assessment. Replacement vegetation may consist of native trees, shrubs and ground covers appropriate to replicate the structure and species composition of vegetation that is removed, subject to County approval.
  - b. New impervious area within the SCA shall not drain directly to the stream. Run-off from new impervious surfaces shall flow to an adjacent pervious area (i.e., vegetated or porous surface).
  - c. New driveways, roads and roadfill slopes shall be located outside SCAs, except at stream crossings.
  - d. Clear span bridges or arched culvert designs shall be utilized at road and driveway crossings over perennial or intermittent streams.
  - e. Permitted work shall not result in alterations that directly or indirectly create barriers to fish migration near or within streams mapped as currently and/or historically supporting salmonids.
3. **Standard Management Practices.** The CDA shall maintain a list of Standard Management Practices to be incorporated into all projects for the protection of hydraulic capacity, habitat and water quality within SCAs. The Site Assessment (Tier 1) will identify those Standard Management Practices appropriate to ensure that adverse impacts of permitted development are avoided. Applicable Standard Management Practices shall be implemented at the earliest possible time but in any event no later than final inspection.

Stream Conservation Area  
Public Review Draft v1.0

4. **Site Assessment (Tier 1).** The Site Assessment (Tier 1) shall be prepared by a qualified professional retained by the County and paid for by the applicant. The assessment shall delineate the extent of the SCA on the lot, including the precise stream location and limits of woody riparian vegetation; recommend Standard Management Practices corresponding to the nature of development; and determine whether the project, in conjunction with Standard Management Practices, would result in adverse impacts to the stream and riparian resources. The Director may waive individual requirements of the Site Assessment (Tier 1) commensurate with the nature and scope of permitted development.

If the Site Assessment determines that there would be no adverse impacts to the SCA, or that any impacts to the SCA can be fully avoided through implementation of specific Standard Management Practices as part of the development approval, the County may proceed to process the application as a Tier 1 permit.

#### **22.63.040 – Stream Conservation Area Permit (Tier 2)**

- A. **SCA (Tier 2) Development.** The Stream Conservation Area Permit (Tier 2) shall be required for any development types not listed as exempt per Section 22.63.020.B or eligible for Tier 1 as provided in Section 22.63.030; to all discretionary approvals; to any project eligible for Tier 1 that does not incorporate the design standards and/or Standard Management Practices; and to any development that would result in adverse impacts to the SCA.
- B. **SCA (Tier 2) Project Review Procedure**
  1. **Discretionary Review.** The Stream Conservation Area Permit (Tier 2) shall be undertaken as a discretionary action subject to incorporation of Design Standards, Standard Management Practices, and/or any other mitigations as determined through a Site Assessment (Tier 2) necessary to avoid adverse impacts to hydraulic capacity; habitat acreage, value or function; or water quality.
  2. **Design Standards.** Stream Conservation Area (Tier 2) Permits shall comply with the following development standards:
    - a. All development standards applicable to Tier 1 permits provided in Section 22.63.030.B.2, except where the a Site Assessment (Tier 2) demonstrates that alternate mitigations would be more appropriate to prevent adverse alteration of hydraulic capacity; a net loss in habitat acreage, value or function; or degradation of water quality.
    - b. Any development that would, on the basis of a Site Assessment, cause or exacerbate existing channel instabilities shall require County approval of a channel stabilization program or comply with to the mitigations generated during the required environmental review process, which could include maintenance of peak flows at pre- and post-project levels, or less. Proposed stabilization measures shall anticipate project-related changes to the drainageway flow regime.
  3. **Standard Management Practices.** The project shall incorporate any applicable Standard Management Practices on file in the CDA, except as determined in accordance with a Site Assessment (Tier 2) and applicable mitigations.

Stream Conservation Area  
Public Review Draft v1.0

- 4. Site Assessment (Tier 2).** The Site Assessment (Tier 2) shall encompass all requirements of the Site Assessment (Tier 1) and determine whether an additional setback is required to avoid adverse impacts to the SCA.

The Site Assessment (Tier 2) shall also include:

- a. Additional studies necessary to determine the extent of development impacts to hydraulic capacity, habitat and water quality including but not limited to hydrological assessments; habitat studies; and stormwater analysis. A hydraulic and/or geomorphic assessment of on-site and downstream drainageways that are affected by project run-off may be required where there is evidence that significant current or impending channel instability is present, as determined by the County. The hydraulic and/or geomorphic assessment shall include on-site channel or drainageway segments over which the applicant has control or access.
- b. A description of mitigation measures that conform to criteria in Section C (Mitigation Criteria), and any additional mitigation measures that would avoid or reduce to the adverse impact of the proposed development on hydraulic capacity, habitat, or water quality within the SCA. Such measures shall include feasible design and site specific measures, in addition to local, state and federal regulations. All such measures shall be incorporated into the project or be required through conditions of approval.
- c. If the lot is not entirely within the SCA, the Site Assessment (Tier 2) shall also evaluate whether potential impacts on water quality, wildlife habitat, or other sensitive resources would be greater as a result of development outside the SCA than development within the SCA.

**C. Mitigation Criteria.** Where development would occur within an SCA, and adverse impacts to hydraulic capacity, habitat, or water quality are identified, mitigation shall conform to the provisions below and shall be incorporated into the project or be required through conditions of approval. The Site Assessment (Tier 2) shall present options for alternative mitigation that meet the following criteria.

1. When removal of riparian vegetation is unavoidable in an SCA, require establishment of native trees, shrubs, and ground covers at a rate sufficient to replicate, after a period of five years, the appropriate density and structure of vegetation removed. Replacement and enhancement planting shall be monitored and maintained until successful establishment provides for a minimum replacement or enhancement ratio of 2:1.
2. A condition of approval for the Stream Conservation Area Permit (Tier 2) shall require a schedule of mitigation work and development work. Mitigation shall be implemented prior to final inspection to minimize any short-term adverse impacts to hydraulic capacity, habitat, or water quality. Mitigation plans must, to the extent feasible, be designed so that mitigations are self-sustaining.

**22.63.050 – Application Filing, Processing and Review**

- A. Filing and processing.** Stream Conservation Area Permit (Tier 1) applications shall be completed, submitted, and processed in compliance with Section 22.40.052 (Initial Application Review for Ministerial Planning Permits). Stream Conservation Area Permit (Tier 2) applications shall be completed, submitted, and processed in compliance with Section 22.40.050 (Initial Application Review for Discretionary Permits). Each Stream Conservation Area Permit shall be analyzed by the

Stream Conservation Area  
Public Review Draft v1.0

Agency to ensure that the application is consistent with the purpose and intent of Chapter 22.33 (Stream Protection).

- B. Project review procedure.** The Director shall approve, conditionally approve, or deny all Stream Conservation Area Permit applications in compliance with the findings required by Chapter 22.63 (Stream Conservation Area Permit).
- C. Public hearings.** When the Stream Conservation Area Permit application is associated with a permit application that requires a public hearing, the Stream Conservation Area Permit action may be taken by the appropriate County hearing body as determined by the Director.
- D. Notice of action and/or hearing date.** Administrative decisions and public hearings on a proposed Stream Conservation Area Permit (Tier 2) application shall be noticed in compliance with Chapter 22.118 (Notices, Public Hearings, and Administrative Actions). The Director may provide expanded public notice to ensure maximum public awareness of any Stream Conservation Area Permit (Tier 2) application.

**22.63.060 – Decision and findings**

The Review Authority shall issue the decision and the findings upon which the decision is based. The Review Authority may approve or conditionally approve an application only if all of the following findings are made:

- A. It is infeasible to completely avoid development within the SCA because the lot falls entirely within the SCA or development outside the SCA would have greater impacts on water quality, wildlife habitat, other sensitive biological resources, or other environmental constraints than development within the SCA as determined by the Site Assessment required by this Chapter; and
- B. The project will meet the requirements of Chapter 22.63; and
- C. The project will not result in adversely alter hydraulic capacity; cause a net loss in habitat acreage, value or function; or degrade water quality.

## RELATED DEVELOPMENT CODE AMENDMENTS

NOTE: Proposed changes are shown in revision marks (deleted text is shown as ~~strike-through~~ and new text is shown as underline)

1. *Add the following to the end of the first paragraph in 22.06.050: The exemptions do not apply to development proposed in a Stream Conservation Area. See Chapter 22.33 (Stream Protection).*

### **22.06.050 – Exemptions from Land Use Permit Requirements**

The following activities, uses of land, and other improvements, are permitted in all zoning districts and do not require a land use permit; however, other permits may be required in compliance with Subsection H., below. The exemptions do not apply to development proposed in a Stream Conservation Area. See Chapter 22.33 (Stream Protection) and Chapter 22.63 (Stream Conservation Area Permit).

- A. Decks, paths, driveways, and other minor improvements.** Decks, platforms, on-site paths, driveways, and other improvements that are not required to have building or grading permits by Title 19 of the County Code, and are not over 18 inches above grade and not over any basement or story below, except in the ARP, RSP, RMP, RX, CP, OP, RCR, RMPC, RF, and IP zoning districts.
- B. Governmental activities.** Official activities and development of the County, State or an agency of the State, or the Federal Government on land owned or leased by a governmental agency are exempt from discretionary permits except Coastal Permits.
- C. Irrigation.** The installation of irrigation lines.
- D. Interior remodeling.** Interior alterations that do not:
  1. Result in an increase in the gross floor area within the structure;
  2. Change the permitted use; and
  3. Change the exterior appearance of the structure.
- E. Repairs and maintenance.** Ordinary repairs and maintenance of an existing improvement, provided that the repairs and maintenance work do not:
  1. Result in any change of the approved land use of the site or improvement; and
  2. Expand or enlarge the improvement.
- F. Play structures.** Typical play structures and play equipment that are not required to have building or grading permits by Title 19 or Title 23 of the County Code and do not exceed 15 feet in height.

Stream Conservation Area  
Public Review Draft v1.0

**G. Utilities.** Public utility facilities shall be exempt from the land use permit requirements of this Development Code only to the extent provided by Government Code Section 53091, and the California Public Utilities Code.

**H. Other permits may still be required.** A permitted land use that is exempt from a land use permit or has been granted a land use permit may still be required to obtain Building Permits or other permits before the use is constructed or otherwise established and put into operation. Nothing in this Article shall eliminate the need to obtain any other permits or approvals required by:

1. Other provisions of this Development Code, including but not limited to any subdivision approval required by Article VI (Subdivisions);
2. Other provisions of the County Code, including but not limited to Building Permits, Grading Permits, or other construction permits if they are required by Title 19, or a business license if required by Title 5; or
3. Any other permit required by a regional, State or Federal agency.

All necessary permits shall be obtained before starting work or establishing new uses.

2. *Delete SCA reference in 22.08.040.E and F for agricultural processing and retail sales.*

22.08.040 - Agricultural District Development Standards

...

**E. Agricultural Processing.** A Use Permit is required: (1) if any agricultural products to be processed are not produced on the same site or on other agricultural properties located in Marin County that are owned or leased by the processing facility owner or operator; or (2) if the building(s) or structure(s) used for processing activities exceed an aggregate floor area of 5,000 square feet. Agricultural products do not include additives or ingredients that are incidental to processing. ~~New processing facilities shall comply with the stream conservation area standards established in the Countywide Plan.~~

**F. Sale of Agricultural Products.** A Use Permit is required: (1) if any agricultural products to be sold are not produced on the same site, or on other agricultural properties located in Marin County that are owned or leased by the sales facility owner or operator; or (2) if the building(s), structure(s), or outdoor sales area used for the retail sales activities exceed an aggregate floor area of 500 square feet. ~~New retail sales facilities shall comply with the stream conservation area standards established in the Countywide Plan.~~

3. *Delete Section 22.42.045 – Design Review for Development Along Anadromous Fish Streams and Tributaries*

~~**22.42.045 – Design Review for Development Along Anadromous Fish Streams and Tributaries**~~

~~In those instances where a vacant legal lot of record in the Countywide Plan's City-Centered, Baylands, or Inland Rural Corridor is proposed for development, any proposed development within the Countywide Plan's Stream~~

Stream Conservation Area  
Public Review Draft v1.0

Conservation Area that adjoins a mapped anadromous fish stream and tributary shall be subject to Design Review as provided by this chapter if the lot is zoned A, A-2, RA, H1, O-A, RR, RE, R1, R2, C-1, A-P, or VCR, including all combined zoning districts. Development includes all physical improvements, including buildings, structures, parking and loading areas, driveways, retaining walls, fences, and trash enclosures. The determination of the applicability of this requirement shall be based on the streams and tributaries shown on the map entitled "Marin County Anadromous Fish Streams and Tributaries," which is maintained and periodically updated by the Community Development Agency.

4. Delete requirement for development and physical improvements that are exempt from Design Review to be located outside of the SCA (22.42.025) and amend Tables 4-2 and 4-3 to remove the Environmental Protection standard requiring development to be located outside of an SCA.

**22.42.025 – Exemptions from Design Review**

Development and physical improvements listed below in Subsections A to O are exempt from Design Review, except as provided by Sections 22.42.030 (Design Review for substandard and hillside building sites), 22.42.035 (Design Review for Certain Driveways) and 22.42.040 (Design Review for Development Along Paper Streets), and except where a Community Plan adopted by the Board of Supervisors requires Design Review to implement specific design standards. In addition, where a conflict arises between conditions of approval of a discretionary application (e.g., Master Plan, Precise Development Plan, Design Review) and the exemptions listed below, the project-specific conditions of approval shall be the applicable regulations. Development and physical improvements that are exempt from Design Review shall be located outside of the Stream Conservation Area and Wetland Conservation Area setbacks established in the Countywide Plan and Article V (Coastal Zones - Permit Requirements and Development Standards). The requirements of Chapter 22.114 (Appeals) do not apply to determinations issued under this Section.

**TABLE 4-2  
STANDARDS FOR EXEMPTION FROM DESIGN REVIEW FOR ONE-STORY  
ADDITIONS TO SINGLE-FAMILY RESIDENCES AND FOR DETACHED ACCESSORY  
STRUCTURES IN PLANNED DISTRICTS**

Standards		One-Story Single-family Additions and Detached Accessory Structure
Max. increase in building area		750 sq. ft. or 20% of the existing building area, whichever is less
Max. total building area		4,000 sq. ft. (3,000 sq. ft. where either the lot or the natural grade in the area of the building footprint has an average slope of > 25%) or the applicable floor area ratio (FAR) limit under the zoning district or in a Community Plan, whichever is more restrictive
Max. height	Single-family Addition	20 ft. or the coastal zoning height standards, whichever is more restrictive

Stream Conservation Area  
Public Review Draft v1.0

	Detached Accessory Structure	15 ft. where either the lot or the natural grade in the area of the building footprint has an average slope that equals or is less than 25% 20 ft. where either the lot or the natural grade in the area of the building footprint has an average slope of > 25%
Min. lot area		Not applicable
Min. setbacks		5 ft. to all property lines on lots up to 6,000 sq. ft. 6 ft. to all property lines on lots up to 7,500 sq. ft. 10 ft. to all property lines on lots up to 10,000 sq. ft. 15 ft. to all property lines on lots > 10,000 sq. ft. (Or the required setbacks in a Community Plan or Master Plan, whichever is more restrictive)
Environmental Protection (Countywide Plan Consistency)		Outside of a <del>Stream Conservation Area</del> and Wetland Conservation Area
SFR Design Guidelines		Complies with Guideline C-1.11 (Exterior Lighting)

**TABLE 4-3  
STANDARDS FOR EXEMPTION FROM DESIGN REVIEW FOR MULTI-STORY  
ADDITIONS TO SINGLE-FAMILY RESIDENCES IN PLANNED DISTRICTS**

Standards	Multi-Story Single-family Addition
Max. increase in building area	750 sq. ft. or 20% of the existing building area, whichever is less
Max. total building area	4,000 sq. ft. (3,000 sq. ft. for lots with average slopes > 25%) or the applicable floor area ratio (FAR) limit under the zoning district or in a Community Plan, whichever is more restrictive
Max. height (Multi-story Additions)	30 ft. in non-coastal zone; 25 ft. in coastal zone or the coastal zoning height standards, whichever is more restrictive; 20 ft. in stepback zone (See SFR Design Guideline B-1.1)
Min. lot area	Not Applicable
Min. setbacks	5 ft. for lots up to 6,000 sq. ft. 6 ft. for lots up to 7,500 sq. ft. 10 ft. for lots up to 10,000 sq. ft. 15 ft. for lots > 10,000 sq. ft. (Or the required setbacks in

Stream Conservation Area  
Public Review Draft v1.0

	a Community Plan or Master Plan, whichever is more restrictive)
Environmental Protection (Countywide Plan Consistency)	Outside of a <del>Stream Conservation Area</del> and Wetland Conservation Area
SFR Design Guidelines	Complies with Guideline B-1.1 (Building Setbacks and Stepbacks) and Guideline C-1.11 (Exterior Lighting)

**B. Agricultural Accessory Structures.** Agricultural accessory structures that comply with ~~the Stream Conservation Area and Wetland Conservation Area~~ setbacks established in the Countywide Plan, the Planned District Development Standards for agricultural zones (Sections 22.08.040, 22.16.040) and Article V (Coastal Zones - Permit Requirements and Development Standards), and that are 300 feet or more from a property line of an abutting lot in separate ownership, and which are at least 300 feet from a street. The minimum setback to qualify for an exemption is reduced to 50 feet for an agricultural accessory structure that does not exceed 2,000 square feet in size. This exception does not apply to facilities for processing or retail sale of agricultural products.

5. *Delete the requirement in Section 22.42.055.B.1.d for development to be located outside of the SCA in order to be eligible for a Minor Design Review.*

**22.42.055 – Project Review Procedures**

**A. Purpose.** This Section provides procedures for Design Review. It includes procedures for reviewing Minor Design Review and Design Review applications.

**B. Minor Design Review.** If a project is not exempt from Design Review as defined in Section 22.42.025 (Exemptions from Design Review), an applicant may apply for a Minor Design Review by staff. A Minor Design Review application may be approved or conditionally approved by staff following a site visit if it meets all of the requirements contained in this Section. A notice of the proposed project shall be posted at the site pursuant to Section 22.118.020(D). The Minor Design Review application is intended to streamline the Design Review process for minor projects that may be approved without required noticing or a public hearing, provided the application does not require a public hearing Coastal Permit. Minor Design Review decisions are appealable pursuant to the requirements of Chapter 22.114 (Appeals).

**1. Requirements.** A project eligible for a Minor Design Review must:

- a. Not conflict with previous County conditions of approval that were imposed on the property;
- b. Be consistent with the purpose of Design Review pursuant to Section 22.42.010 (Purpose of Chapter);
- c. Comply with existing Master Plans and applicable standards in a Community Plan;
- d. Be located outside of ~~Stream Conservation Areas~~, Wetland Conservation Areas or other mapped environmentally sensitive areas as designated by the Countywide Plan;

Stream Conservation Area  
Public Review Draft v1.0

- e. Comply with the County's Single-family Residential Design Guidelines;
- f. Comply with Marin County Green Building Standards (Section 19.04.110) and exceed Minimum Compliance Threshold by one level, with the exception that additions with a valuation exceeding \$300,000 shall attain a minimum compliance threshold that requires 20 additional points than that which is required by the Green Building Standards; and
- g. Not be located on a property that meets either of the following conditions, as applicable:
  - 1. If the residence on the property was not subject to Design Review, final inspection by the Building and Safety Division has not been approved or was approved less than 24 months ago; or
  - 2. If any previous addition to the residence on the property was issued a Minor Design Review pursuant to Section 22.42.055 (B), final inspection by the Building and Safety Division has not been approved or was approved less than 24 months ago.

6. *Delete reference to compliance with SCA for new second units in Section 22.56.050.L.*

**Chapter 22.56 - SECOND UNIT PERMITS**

...

**22.56.050 - Decision and Findings for New Second Units.**

...

- L. A second unit shall be located outside of the ~~Stream Conservation Area~~ and identified Wetland Conservation Areas except under the following circumstances: (1) the unit is created within an existing authorized primary or accessory structure through the alteration of existing floor area without increasing the cubical contents of the structure (with the exception of minor dormers, bay windows, and stairwells); and (2) no site disturbance related to the provision of parking and access improvements or other construction encroaches into a ~~Stream Conservation Area~~ or Wetland Conservation Areas.

7. *Delete Section 22.62.040.J.3's reference to removal of protected or heritage trees within an SCA.*

**22.62.040 – Exemptions**

The removal of any protected or heritage tree on a lot is exempt from the requirements of this Chapter if it meets at least one of the following criteria for removal:

- A. The general health of the tree is so poor due to disease, damage, or age that efforts to ensure its long-term health and survival are unlikely to be successful;
- B. The tree is infected by a pathogen or attacked by insects that threaten surrounding trees as determined by an arborist report or other qualified professional;

Stream Conservation Area  
Public Review Draft v1.0

- C. The tree is a potential public health and safety hazard due to the risk of its falling and its structural instability cannot be remedied;
- D. The tree is a public nuisance by causing damage to improvements, such as building foundations, retaining walls, roadways/driveways, patios, sidewalks and decks, or interfering with the operation, repair, or maintenance of public utilities;
- E. The tree has been identified by a Fire Inspector as a fire hazard;
- F. The tree was planted for a commercial tree enterprise, such as Christmas tree farms or orchards;
- G. Prohibiting the removal of the tree will conflict with CC&R's which existed at the time this Chapter was adopted;
- H. The tree is located on land which is zoned for agriculture (A, ARP, APZ, C-ARP or C-APZ) and that is being used for commercial agricultural purposes. (This criterion is provided to recognize the agricultural property owner's need to manage these large properties and continue their efforts to be good stewards of the land.);
- I. The tree removal is by a public agency to provide for the routine management and maintenance of public land or to construct a fuel break;
- J. The tree removal is on a developed lot and: 1) does not exceed two protected trees within a one-year timeframe; 2) does not entail the removal of any heritage trees; and 3) does not entail the removal of any protected or heritage trees within a ~~Stream Conservation Area~~ or a Wetland Conservation Area.

It is recommended that a property owner obtain a report from a licensed arborist or verify the status of the tree with photographs to document the applicability of the criteria listed above to a tree which is considered for removal in compliance with this section.

8. *Add new definitions.*

**Disturbed Area.** An area that has experienced significant alteration from its natural condition as a result of clearing, grading, paving, construction, landscape and other activities, as determined by the Director.

**Stream, Perennial.** A watercourse that flows throughout the year (except for infrequent or extended periods of drought), although surface water flow may be temporarily discontinuous in some reaches of the channel, such as between pools. Perennial streams can be spatially intermittent but flow all year.

**Stream, Intermittent.** A watercourse that is temporally intermittent or seasonal and that flows during the wet season, continues to flow after the period of precipitation, and ceases surface flow during at least part of the dry season.

**Stream, Ephemeral.** A watercourse that carries only surface runoff and flows during and immediately after periods of precipitation.

**Stream Conservation Area Setback.** The distance measured laterally and perpendicular to the top of bank or edge of woody riparian vegetation. See Section 22.33.030.B.

Stream Conservation Area  
Public Review Draft v1.0

**Top of Bank.** Top of bank is the elevation of land that confines waters of a stream to their natural channel in their normal course of flow, and above such elevation the waters will leave the channel and disperse in an uncontrolled manner.

9. *Amend definitions of discretionary and ministerial permits to include references to Site Development Permit (Tier 2) and (Tier 1), respectively.*

**Discretionary Permit.** A permit granted by a review authority in response to a land use permit application after applying the exercise of judgment or deliberation prior to making a decision. Includes any of the following entitlements/approvals established by Article IV (Land Use and Development Permits): Coastal Permits, Design Review, Floating Home Adjustment Permits, Floating Home Architectural Deviations, Master Plans and Precise Development Plans, Use Permits, Sign Review, Stream Conservation Area Permit (Tier 2), Temporary Use Permits, Tentative Maps, Tidelands Permits, and Variances. See also "Ministerial Permit."

**Ministerial Permit.** A permit granted to a project after applying fixed, objective standards with little or no subjective evaluation as to the wisdom or manner of carrying out the project. Examples are Sign Permit, Large Family Day-care Permit, Homeless Shelter Permit, Certificate of Compliance, Second Unit Permit, Stream Conservation Area Permit (Tier 1), Final Map approval, and Building Permits. See also "Discretionary Permit."

10. *Amend definition of Stream Conservation Area.*

**Stream Conservation Area.** ~~An area designated by the Marin Countywide Plan along all natural watercourses shown as a solid or dashed blue line on the most recent appropriate USGS topographic quadrangle map, or along all watercourses supporting riparian vegetation for a length of 100 feet or more. See Marin Countywide Plan policy EQ-2.3.~~ The SCA consists of the stream itself between the tops of the banks and a strip of land extending laterally outward from the top of both banks to the widths defined in Section 22.33.030.B and shown in Figure 3-16. The SCA extends along those perennial, intermittent, and ephemeral streams identified in the SCA data and map that is maintained and periodically updated by the Marin County Community Development Agency.

11. *Amend Chapter 22.40 – Application Filing and Processing, Fees to include the SCA Permits*

**TABLE 4-1  
REVIEW AUTHORITY FOR DISCRETIONARY APPLICATIONS**

Type of Permit or Decision	(1) (2) Role of Review Authority			
	(3) Director	(3) Zoning Administrator	Planning Commission	Board of Supervisors

Zoning Map Amendment	Recommend		Recommend	Decide

**Notes:**

1. "Recommend" means that the Review Authority makes a recommendation to the decision-making body; "Decide" means that the Review Authority makes the final decision on the matter; "Appeal Action" means that the Review Authority may consider and decide upon appeals of the decision of an earlier decision-making body, in compliance with Chapter 22.114 (Appeals).
2. In any case where a project involves applications for more than one entitlement, and entitlements require review and approval by different review authorities, all entitlements shall be reviewed and decided upon by the highest Review Authority.
3. The Director or Zoning Administrator may refer any matter subject to the Director's or Zoning Administrator's decision to the next highest authority, so that the next highest Review Authority may instead make the decision.

**22.40.030 – Application Submittal and Filing**

- A. Applicability.** This Section shall apply to the submission and processing of the following development applications:

**Discretionary Permit Applications**

1. Design Review;
2. Floating Home Adjustment Permits and Architectural Deviations;
3. Master Plans or Precise Development Plans;
4. Temporary Use Permits;
5. Tentative Maps and Vesting Tentative Maps;
6. Lot Line Adjustments;
7. Stream Conservation Area Permit (Tier 2)
- ~~7~~8. Tidelands Permits;

Stream Conservation Area  
Public Review Draft v1.0

~~8~~9. Tree Removal Permits

~~9~~10. Use Permits;

~~10~~11. Variances; and

~~11~~12. Sign Reviews.

**Ministerial Planning Permit Applications**

1. Certificates of Compliance

2. Homeless Shelter Permits

3. Large Family Day-care Permits

3. Second Unit Permits

4 Sign Permits

5. Stream Conservation Area Permit (Tier 1)

~~5~~6. Use Permit Renewals
