

Energy Upgrade California® Home Upgrade

Energy

INTRODUCTION

Energy Upgrade California® Home Upgrade is a state-wide rebate program designed to help homeowners make energy efficient improvements to the home by providing rebates and technical support. Home Upgrade in Marin County is implemented by local county governments and the Bay Area Regional Energy Network (BayREN). Look for current rebate amounts and program updates at www.bayareaenergyupgrade.org.

Home Upgrade Benefits

Save on Utility Bills:

- Home Upgrade takes the “whole home” approach and maximizes efficiency by examining how the systems in your home work together (i.e. insulation and building envelope leakage).

Know Your House:

- Having a contractor run a complete energy report on your home’s energy systems and then giving you that report is like having an energy owners manual for your house.

Increased Comfort and Air Quality:

- Upgrading insulation can be a big factor in improving comfort levels in the home
- Replacing or cleaning and sealing duct systems prevents dirty air from the crawl space or attic from entering your forced air system.

Rebates and Free Technical Support:

- Free start-to-finish support from a Home Upgrade Advisor. Call (866)878-6008 to speak to a third-party Building Performance Institute certified energy professional about your project.
- Rebates based on efficiency improvements to your home; check www.bayareaenergyupgrade.org for current rebate amounts.

Measures Eligible for Rebates
