Dear Laurette, Terri, and Liz,

On behalf of Marinwood Community Services District, we would like to express our gratitude to STRAW, MCSTOPPP, and the Watershed Programs for your collaboration with the Miller Creek Middle School students and faculty in the on-going maintenance and restoration of Miller Creek.

For twelve years, the middle school students have removed non-native plants and done general clean-up of Miller Creek adjacent to our Firemen's Picnic Area under the guidance, supervision and instruction provided by your programs. This on-going project benefits everyone involved: the Community Service District's stream property receives much needed work, and the students receive hands-on environmental experience and learn the value of stewardship of our natural resources.

In 1992, the Community Services District received a Department of Water Resources grant for streambed repair and restoration in Miller Creek. A grant condition was the mandate that there be an education component to the work. This on-going project fulfills that requirement, and contributes to the preservation Miller Creek, an invaluable natural and community resource.

Very truly yours,

Gary Harrelson, Park & Open Space Manager

Thomas D. Horne, District Manager
