The OWOW program is a partnership between local government agencies and businesses to reduce water pollution caused by pesticides. This pocket-guide offers product choices that are less toxic to people, pets and the environment. For a larger list, visit www.ourwaterourworld.org

Are Products Really Necessary?

Products (even those found in this pocket guide) should not be the first line of defense against pests! Good pest management should focus on preventing pest problems to begin with. This might mean keeping counters free of crumbs to avoid ants, pruning out aphid populations before they get out of control, using slow-release fertilizers or compost that allow grass and plants to absorb nutrients more efficiently, or attracting beneficial insects — such as ladybugs and green lacewings — that help keep garden pests (like aphids and mealybugs) under control.

Many gardeners kill beneficial insects because they mistake them for pests. When you lose beneficial insects, you lose one of the best nontoxic defenses to a healthy garden! For more information on these garden predators, go to www.ipm.ucdavis.edu/PMG/NE/index.html

Things to Avoid and Why

- **Aerosols and Home Foggers**
  Aerosols and home foggers disperse chemicals in a way that significantly increase the risk of exposure to unintentional targets — including people and pets.

- **Metaldehyde Snail Baits**
  They contribute to hundreds of pet poisonings per year.

- **Pyrethroids**
  Avoid products ending in "thrin."** They belong to a class of pesticides called pyrethroids and are a threat to water quality. They are also highly toxic to aquatic insects and crustaceans. The exception to this is pyrethrin which is produced naturally from the chrysanthemum flower.

- **Lawn Pesticides**
  Lawn weed killers and insecticides are rarely, if ever, needed for home lawns. Chemicals in them are linked to adverse long-term health effects. In particular, “weed-and-feed” type products, which mix fertilizers with pesticides, result in unnecessary pesticide use. See www.beyondpesticides.org/lawn/index.htm

PEST AND LESS TOXIC ALTERNATIVES

Ants
- Combat Quick Kill
- Combat Source Kill
- Grant’s Kills Ants
- Orange Guard
- Safer Roach and Ant Killing Powder
- Tanglefoot Pest Barrier
- Terro II Liquid Ant Baits

Aphids
- Bonide Rose RX 3 in 1
- Bug Blaster
- Concern Pesticidal Oil
- Greenlight Neem
- Greenlight Rose Defense
- Insecticidal Soaps (e.g. Bonide, Garden Safe, Concern)
- Ortho Volk Oil
- Sunspray Ultra-Fine Oil

Cockroaches
- Combat Quick Kill
- Combat Roach Killing Gel
- Concern Crawling Insect Killer
- PIC Boric Acid Roach Powder
- Roach and Insect Magnet
- Roach Motel or Roach Pute
- Safer Crawling Insect Killer
- Safer Roach and Ant Killing Powder

Fleas
- Concern Crawling Insect Killer
- Fleanix
- Greenlight Biorganic Lawn & Garden*
- Insecticidal Soaps*
  *(will work on adult fleas and is only to be applied outdoors where pets may be lying)
- Safer Crawling Insect Killer

Mealybugs
- Bonide All Seasons Oil
- Concern Pesticidal Oil
- Lily Miller Superior Type Oil
- Monterey Safe-T-Cide
- Ortho Volk Oil
- Stoller Natur’l Oil
- Summit Year Round Oil

Mosquitoes
- Bayer Mosquito Preventer Granules
- Bonide Mosquito Plunks
- Mosquito Bits
- Prestrike granules (larvae control only)
- Summit Mosquito Dunks
- Vectobac

Mites
- Bonide All Season’s Oil
- Bonide RX 3 in 1
- Garden Safe Fungicide 3
- Greenlight Neem
- Greenlight Rose Defense
- Lily Miller Superior Type Oil
- Master Nursery Pest Fighter Oil
- Ortho Volk Oil
- Summit Year Round Oil
- Sun-Spray Ultra Fine

Snails and Slugs
- Bayer Dual Action Slug and Snail
- Bonide Slug Magic
- Copper Barrier Tape
- Escargo
- Garden Safe Slug and Snail
- Sluggo
- Worry Free

Whiteflies
- Whitefly Sticky Traps
  (See Mite Control Oil Products)

Yellowjackets
- Traps
  Revised: September 2006

LESS TOXIC ACTIVE INGREDIENTS

Active ingredients are listed on the front of the product. The following is a partial list of active ingredients found in products that are considered less toxic. For a more complete listing, go to www.ourwaterourworld.org

- abamectin
- ammoniated soap of fatty acids
- arsenic (ONLY in containerized bait form)
- Bacillus subtilis
- Bacillus thuringiensis isrealensis
- borax and boric acid
- canola oil
- castor oil, vegetable wax, gum resin
- citric acid
- clove, rosemary, sesame and thyme oil
- corn gluten
- d-Limonene
- diatomaceous earth
- eugenol
- fipronil (ONLY in containerized bait form)
- hydramethylnon (ONLY in containerized bait form or gel)
- hydrophobic extract of neem
- iron phosphate
- lemon eucalyptus oil
- methoprene
- orthoboric acid
- paraffinic oil
- petroleum oil
- picaridin
- potassium bicarbonate salt
- potassium soap (or salts) of fatty acids
- sodium tetraborate decahydrate
- soybean oil and cottonseed oil
