1. Can you advise where I can find a copy of the current Emergency Operations Plan for the County of Marin? I was able to locate the 2014 document. Please advise if there is something more current.
   a. The most current Emergency Operations Plan (EOP) is the 2014 version located [here](#). The County of Marin is currently working with a consultant, Tidal Basin, to update this version of the EOP.

2. Is there a budget range for this opportunity?
   a. The County’s intent is to award this contract at an amount not to exceed $100,000.

3. What is the budget amount that the vendor should keep in mind when determining the number of hours and associated fees for this engagement?
   a. The County’s intent is to award this contract at an amount not to exceed $100,000.

4. Are methodology/approach, experience beyond the 1-page qualifications statement, and resume sections eligible to be submitted as part of this bid?
   a. Yes.

5. Has the Marin County’s Office of Emergency Services (OES) had a similar organizational review and assessment performed in the past?
   a. No.

6. Has the Marin County Sheriff’s Office of Emergency Services (OES) had a similar operational review performed in the past?
   a. No.

7. Are there special circumstances or events that generate the need for the services described in the RFP?
   a. The County of Marin believes that now is a good time to reassess our emergency management organizational structure, alignment, resourcing, and other aspects of how we plan, prepare, and respond to future emergencies - particularly considering climate change impacts, including fires, Public Safety Power Shutoff (PSPS) events, floods, heat and air quality public health impacts, among other local emergency events. Part of this reassessment will be lessons learned from the numerous emergencies including wildfires in and out of county, flooding, sheltering, and other events. The County wants to ensure we have the best organizational structure and operational resources in place to prepare for, mitigate, respond to, and recover from more frequent disasters.
